winIPRO Contact Lens: Be in the best position to compete with discounters

In close collaboration with experienced contact lens fitters, we have revised and improved the winIPRO Contact Lens programme.

Made For Fitting

Many suggestions from practices have been incorporated. Look and see!

The Fitting of Both

Both the supply of basic lenses and extensive procedures can be optimally documented.

CL-Stock

We have now added the stock management for contact lenses. You now have the time-tested options of the winIPRO stock management available in contact lenses, too.

With our new module winIPRO Club Management you can offer your patients clubs for spectacles, contact lenses and hearing aids.

Download of Contact Lens Catalogues

Contact lens catalogues of international standards can be downloaded in the same easy way as lens price lists. This saves time. The classification of the lenses is done automatically from the catalogue, leading to meaningful evaluations and statistics.

Barcodes and prices will be available. This prepares the basis for stock take and stock management.

Contact Lens Stock and Trial Lens Set Management

The contact lens stock programme works in the same way as the frames stock programme – our users do not have to learn how to use a new programme but can start using right away. It gives you an overview of the stock on hand and stock movements in single practices and branch networks. Barcode for products and LOT numbers speed up the input and ensure accurate entries, even via EPoS.

The new winIPRO Contact Lens Card File

The new card file design allows for both quick order entry and detailed documentation. It has been developed together with IPRO-users. Its basis is the product catalogues from the CL-manufacturers, which are available for download at the IPRO data service. The Contact Lens Stock and Trial Lens Set Management give you control and a clear overview. Ordering systems of various manufacturers have been integrated.

The new Contact Lens module has a lot to offer

- New CL card file layout with improved representation of all steps of the fitting process
- Accelerated contact lens supply
- Contact lens price info
- Electronic ordering
- LOT Number management to record all dispensed medical products
- Large „Remark“ fields for detailed clinical documentation

winIPRO Stock Management for Contact Lenses

- Fast and efficient stock management for replacement schemes
- Trial lens set management
- Complete handling of the cleaning cycles for trial lens sets
- Recording of stock receipts via the packaging barcode
- Detailed stock analysis (sales, purchase planning, sell-by date, ...)
- Full functionality within a branch network
