winIPRO Documents Management

We all know the story: A short notice from the GP, a hand-written remark on a NHS-form, or a confirmation from the patient. Papers, slips, documents which have to be archived, but for which there is no proper space any more in this age of electronic patient card files.

NEW: Store documents and images in the patient card file

With our new winIPRO Documents Management you can now not only scan in documents using any standard scanner, but also assign files of various formats to a patient. The Documents Management is displayed as a tab in the patient card file, giving you an instant overview on all documents assigned to this patient.

Icon	Content	File extension
	Scanned documents and images	jpg gif bmp png
	MS Office Word	doc
	MS Office Excel	xls
	Adobe Acrobat	pdf
	Text files	txt

Scanning in the winIPRO Documents Management

What our users say

Rawert Opticians, Cuxhaven

By adding the Documents Management module to our system, the winIPRO patient card file now offers a very powerful and extended usability. Completely different documents and images from all kind of sources, e.g. GP letters, delivery notes, fitting images, NHS letters or specs slips, can now be included very easily in the patient card file. No paper any more! Less storage space needed! A big help.

Joachim Rawert, MD
