## winIPRO Eye Examination – Show your competence

### Clearly arranged and easy to use

The eye examination and refraction data are the basis of your daily work, both for spectacles dispensing or contact lens adaptation. Extended measurements and sophisticated eye tests have to be documented in detail; and slit lamp images, keratometer sessions and sketches are also part of a good documentation.

The winIPRO Eye Examination Report solves extremely well the problem of presenting these details in a clear layout.

**The big advantage:** Data are only input once, imported from the instruments or entered directly after the test. Then, they are available in every programme part. They can be included in any spectacles or CL-order at the touch of a button, and do not have to be recorded over again.

Use the Eye Examination Report to archive your refraction and clinical data and optimise your workflow.

With its clear layout, the programme offers maximum transparency. Only the desired data are shown in the monitor's limited space. All additional info and clinical data are available in full detail at the touch of a button.

### Which data are managed with the Eye Examination Report?

Each patient record can hold an almost unlimited number of extensive examination reports. Within an examination report, you can record and store clinical sheets, screenings, consultations, measurements, refractions, PD-measurements and corneal radii. Powers, PD for far/near/intermediate, BVD, VA, (monocular, binocular), CD, corneal radii with calculation of eccentricities as per Top-Test or sagittal radius measurement and much more – you can, if you wish,

record all this. This wealth of data is of great use, as you can always look up any aspect of any examination, enabling you to compare current and past patient data at a glance. You decide how the examination report is used.

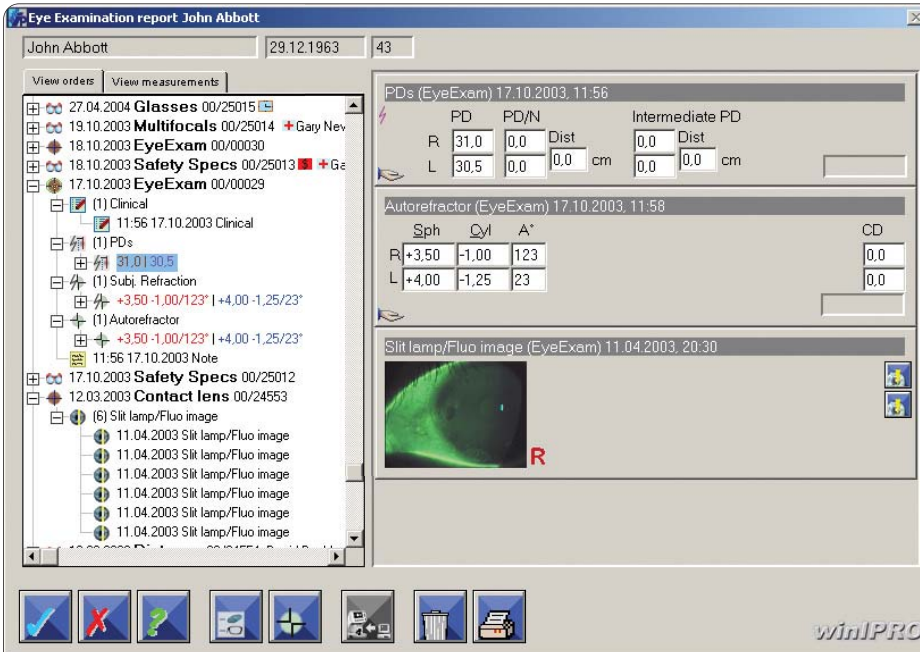

You decide which input fields are offered by default, and can always adapt the programme to your needs.

### YOUR IPRO-REPRESENTATIVE SUPPORTS YOU IN SETTING UP AND EXPANDING YOUR EXAMINATION OPTIONS.

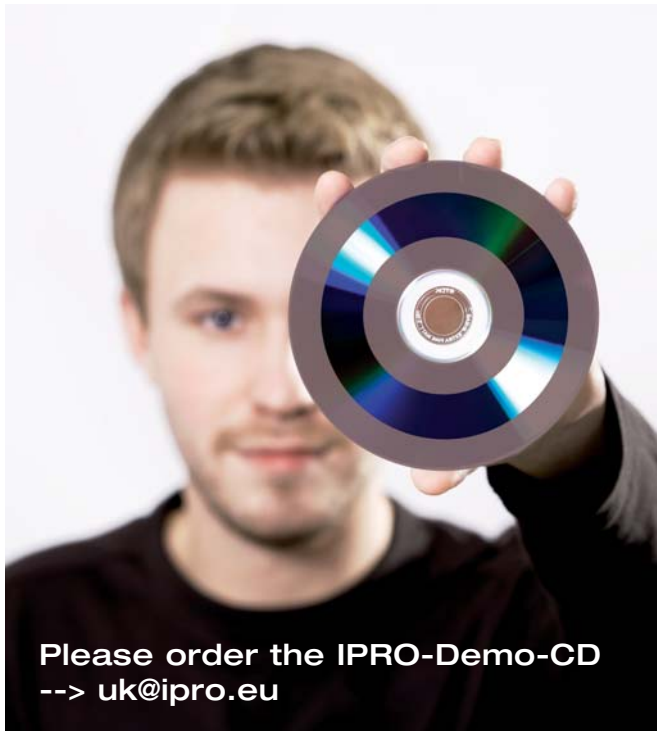

- He helps you to optimise your work-flow
- With you he designs your individual clinical or history and symptoms sheets
- He ensures for the integration of your refraction instruments, slit lamp and keratometer findings into winIPRO
- He trains you and your staff to use our software and shows the best solutions for any problem.

**BECAUSE WINIPRO IS NOT JUST SOFTWARE. WINIPRO IS A CONCEPT WHICH HELPS YOU TO OPTIMISE YOUR PRACTICE.**

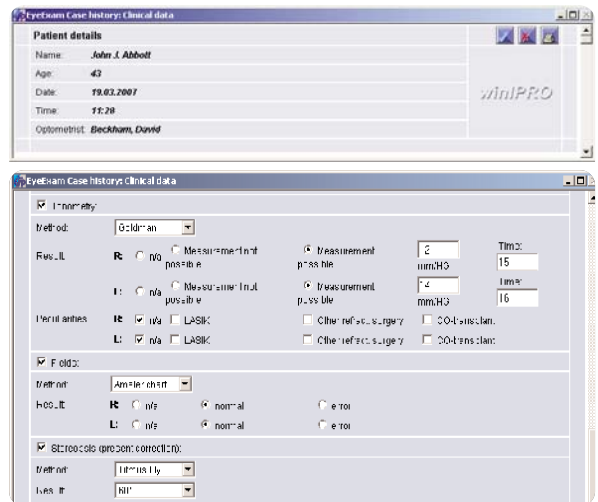

The order history shown in the examination report.
