IPRO-Software

IT in a professional practice is much more than just a practice management system or video consultation programme. From refraction and lens selection to frames selection, there are powerful software solutions available to support the optician. IPRO has taken on the task of integrating the various software and hardware solutions, to reduce the necessary inputs while gaining maximum usability for winIPRO users. That is the reason for the many and often unique IPRO interfaces.

EPoS

ADS Standard
Cash-drawer

ADASYS II

Crossbow
